

# SoulBound Protocol

Soulbound is the first community-centric and reward-oriented launchpad created on Bitcoin's Layer2. It also holds the distinction of being the first endeavor to bridge the Bitcoin ecosystem with the BNB Chain, fostering a flourishing ecosystem of diverse blockchains. In future developments, Soulbound is set to expand its integration with multiple chains.

## PRODUCTS AND SERVICES

### ● SOULBOUND BADGE

- Users must acquire a SoulBound BADGE to participate in the SOULBOND protocol and start generating incentives reward.
- users can invest in projects that will be listed on Launchpad according to their SoulBound BADGEs tiers.

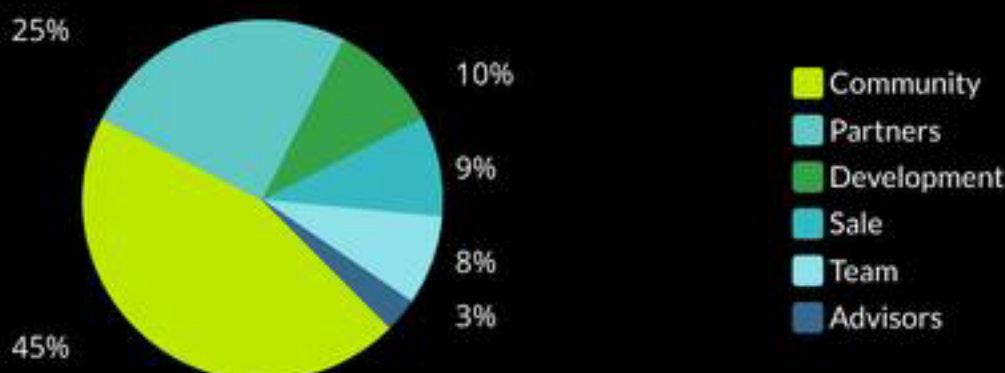

### ● SOULBOUND GOVERNANCE \$SBB

\$SBB is the governance token of the SoulBound Protocol. It captures the fee revenue that is generated by the system and incentivizes the SBB holders as STAKING rewards in BTC and BNB.

### ● BRC20 & ARC20 AIRDROP \$SBPT

BRC20 and ARC20 will be reward for early adopters of the SoulBound Protocol. It will be airdropped to our community as a gift, which can also be staked to earn some revenue from platform fees in BTC (First BRC-20 that has a staking reward as BTC)

## Tokenomics
